

Marcus Davies
Parent Governor

UTC Sheffield City Centre Local Governing Body

Pecuniary Interests	19 January 2018	Employee DWF LLP Law Firm
<p>Personal Profile:</p> <p>Born and raised in Sheffield, I have a strong sense of pride in my home city. Sheffield has in the past suffered from stilted commercial development but I have been heartened to note recent investment by key entities such as McLaren. I keenly follow the local press and I recall the positive announcement of the building and subsequent inception of UTC in September 2013. It was with a sense of pride that my eldest son Ethan secured a place to study Engineering from September 2017. I feel that Ethan is now in a forum in which he may build upon his core attributes and gain access to fantastic opportunities wherever his learning takes him, whether that is an apprenticeship or a University education.</p> <p>I live in Totley and I have a busy and fulfilling life. I work as a lawyer and I have 4 children ranging from a 2 year old in nursery to a 21 year old at University. I feel that my intimate knowledge of Sheffield stands me in good stead to hold a Governor role, in addition to my business experience. I am passionate in my beliefs yet I consider myself to be a careful listener and I would welcome the opportunity to represent parental interests as a member of the Governing Body.</p> <p>I recognise the importance to the students' education of the role of Governor. It is a position I would regard as a privilege once elected.</p>
