

Steve Elliott
Curriculum Director, Engineering Technologies
The Sheffield College

UTC Sheffield City Centre Local Governing Body

Pecuniary Interests	10 January 2018	Director of Curriculum The Sheffield College
<p>Personal Profile:</p> <p>I have worked in the Engineering Manufacturing sector for over 20 years within the Textile, Aerospace and Printing Industries as an Engineer and Engineering Management positions. I specialised in using advanced machine tools, lean methodologies and manufacturing processes.</p> <p>Five years ago I decided to leave industry to attend University and complete a PGCE to fulfil a long held desire to work within the Further Education sector and train the future generations of Engineers. My first role in education as an Engineering Lecturer at Loughborough College four years ago progressed quickly, and I was promoted to Teaching and Learning Lead for Engineering and Computing where I was awarded the College Award for Teaching Innovation for my development of the delivery of student engineering projects. After working at Chesterfield College for 18 months as a Curriculum Manager, I started my role at The Sheffield College in September 2017. I am currently Director of Curriculum for Engineering Technologies at The Sheffield College where I have worked with the staff within the directorate to develop quality of the teaching and learning of the provision and grow the Engineering, Automotive and Digital curriculum offers. This has been achieved through working closely with employers, as well as meeting the skills need of the region.</p> <p>Steve's skills are:</p> <ul style="list-style-type: none"> Curriculum Development Employer Engagement Improving the Student Experience Communication and People Management
